The Future for Cost Effective Production with Sustainability

Hawk CleanPrint
66" High-Volume Inkjet Printer with Clean Ink Technology

Unbeatable Production Quality
Impress even the most discerning customer with consistent image quality with up to 2400dpi, and High speed productions mode to meet the markets high demands.

Precise Print Size
Print without compromises with up to 66" media

Best in class total cost of ownership
Increase profitability by investing in Clean technology that has the lowest production cost

Enjoy the Eco friendly CleanInks
Outperform your competition with a cutting edge color gamut, ultra low VOC's and the most environmentally friendly CleanInks

Hawk CleanPrint Features

Feature Check for the perfect Clean Ink Solution

- Full edge 66" print capability
- Same day delivery for highly demanding markets
- Integrated hot and cool curing system for instant adhesion
- Inbuilt media sensor for accurate media movement
- Unique water-based synthetic ink formulation for a sustainable approach

- Low running cost
- High production 1 litre ink cartridge
- Unmatched quality with adjusted dot placement technology
- Odourless inks for healthy operating environment
- Easy maintenance with automatic printhead cleaning

Superior Ink Quality at Minimum Cost

Using the all new Clean Inks, the Hawk is a step forward towards the eco-solvent technology, providing richer solids, smoother gradations, with a broader color gamut. The ink system features include refillable ink reservoirs with maximum ink efficiency providing you with big savings on running cost.

Quality with technology

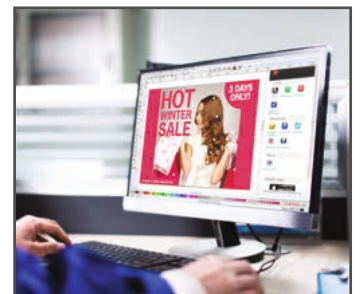

ADP TECHNOLOGY

NORMAL QUALITY

With 1200-2400dpi High Definition output Hawk CleanPrint uses Adjusted Dot Placement Technology (ADPT) to ensure prints have vibrant colors along with smooth gradations in skin tonnes and sharp text.

Piezo Inkjet Technology

The high precision inkjet technology enhanced in the all new Hawk Printheads provides flawless results throughout production with giving all the users an overall High Quality printing experience.

StratoFlex RIP Included

Hawk comes bundled with StratoFlex RIP software, providing ease of use capabilities, and advance RIP processing system allowing users to RIP their pdf, jpeg and other formats faster. The RIP software also includes bundled programmes to run cutting solutions as well as multiple StratoJet printers.

Hawk CleanPrint Applications

Posters	Window Graphics	Vehicle Wraps

Fulfill all your current jobs faster – with ability to do more applications

With StratoJet Clean technology, print all your current traditional signage jobs at faster speeds than before along with better quality. Get the ability to do more applications with odour free ink solutions, and add all this at lower operation costs giving more revenue and growth to your business.

We understand quality is important even at high speeds that's why every feature we design provides optimum quality and text controls even in production and billboard modes :

- Sharp text even on production modes
- Heavy duty robust design to eliminate vibration
- Dual Clean Printheads with Industrial Piezo Frequency
- Advance software calibration controls
- Infrared media feed controls input and output
- Top of line image processor for better file processing and image quality
